

# A VERY HEARTFELT THANKS!

We appreciate those who  
bought for the first time in  
2021 and we gratefully  
acknowledge those who  
have been buying  
Foundation Beefmasters  
for twenty, thirty, and even  
seventy years.

## **73rd Annual Foundation Beefmaster Bull Sale**

September 9th & 10th, 2022

**Falfurrias Texas**

### **Offering:**

**46 - 2 yr old Bulls**

**16 - 3 yr old Bulls**

**10 - Retired Herd Sires**

Foundation Beefmasters  
5201 Camp Bowie Blvd #200  
Fort Worth, TX 76107

Home of the Foundation Herd of the  
Beefmaster Breed  
(80 years in the making)

Dear Friends,

I hope 2022 has been manageable.

Welcome to Falfurrias. Land of hearts Delight.

2022 has been a year of change and good news. In the midst of Colorado's worst drought on record, I found excellent grass in Falfurrias Texas. We have not grown any grass in Julesburg this year and have just a hint of green at Matheson.

The Foundation Herd of the Beefmaster Breed was moved to Falfurrias in late February. In March, we weaned an excellent set of calves and had a great breed up on the ongoing cow herd.

The herd was sold to Bobby and Sherri Patton in May. Through the beginning of the summer, we received timely rains and have just now had 4-6 inches over the entire ranch.

For the first time since 2012 the entire herd will be on display for the bull sale; older cow pairs, first calf heifer pairs, long yearling heifers along with our yearling keep bulls.

We calved 320 cows this summer. This closed cow herd (80-year genetic experiment) is thriving and stronger than ever.

Bobby and I are glad you are here to see the Foundation herd of the Beefmaster breed in action.

Abrazos

Alex Lasater

## Semen Available from these Foundation Beefmaster Herd Sires

### Lasater Beefmaster 8208

Sired by one of our most prolific semen sires 4290; who sired 6 outstanding Foundation Herd Bulls. He is long and well-muscled, the way he is built stands out in a group. As a three year old he was well ahead of his peers in scrotal measurement. He sired by far the most calves born in 2012..... 33 bull calves: 15 had IMF ratios of over 100, 12 had REA ratios of over 100, 14 had yearling ratios averaging 105

### Lasater Beefmaster 4290

Lasater 4290 is proving to be one of the best herd sires that we've raised in quite a while. As a two-year-old, he was the most prolific among his multiple-sire group, leaving 13 sons. Those 13 sons had an average weaning weight ratio of 107 and yearling weight ratio of 103. And then he did it again as a three year old, leaving 12 sons with an average weaning weight ratio of 109 and yearling weight ratio of 106. **Exportable.**

**Semen Available from these  
Foundation Beefmaster Herd Sires**

**Lasater Beefmaster 5096**

Lasater 5096 is a 1995 model out of a two-year-old dam and has the conformation and performance that will never go out of style. He combines two characteristics that don't always go hand-in-hand: power and style. He is massive, larger-boned, heavily muscled, and yet he is smooth made, sound, correct, and naturally athletic. He has been widely used in the U.S. and Mexico with great success.

**Lasater Beefmaster 4248**

Lasater 4248 is one of our newest addition to our A.I. lineup. Like Lasater 3705, he is also out of a proven 8-year-old dam. He shares the same breed-leading capacity, phenotype and attractive muscle pattern of his sire, Lasater 1526. He is certainly one of 1526's best sons, if not the best, and that is saying a lot. As a two-year-old, we were not surprised to find out that he had one of the largest Ribeye Areas, 16.9. His first sons sold in our 2008 sale.

home to corroborate.***

## **Schedule:**

### **Thursday, September 8th**

12 Noon – Lunch

Afternoon – Cattle Viewing and Ranch Tours

### **Friday, September 9th - Contract Female Selection / Field Day**

7:30 AM – Breakfast Tacos

8:30 AM – Bred Female Contract Selection  
and Private Treaty Offering

11:30 AM – Lunch

1 PM – Retired Herd Sire Auction

1:30 PM – Speaker and Cattle Viewing

6 PM – Steak Dinner at the Dog Barn

### **Saturday, September 10th – Production Sale**

7:30 AM – Coffee and Breakfast

8 AM – Office open for Buyer's to receive  
numbers

10 AM – Bull Sale  
Lunch will be served following the  
sale

## **Semen Available from these Foundation Beefmaster Herd Sires**

### **Lasater Beefmaster 5367**

Foundation 5367, is our most prolific bull ever. Born in 2015 from a 10 year old dam, in his first year of service, he sired 32 calves. A typical outstanding bull may sire 15 - 20 calves. When we chose him as a yearling we were impressed with his muscling at such a young age. At age two, although he was very active during the breeding season, had a significant weight gain. Our fourteen 2018 yearling keep bulls, who were born in 2017, include three bulls sired by him; two of whom had well above average gains over the summer. **Exportable**

### **Lasater Beefmaster 0192**

Lasater Beefmaster 0192 was noticed early in his career and quickly became one of our elite AI Sires, and as a result he has been widely used all around the world. You can't imagine a more massive, powerful, heavily muscled, attractive bull than Lasater Beefmaster 0192. As a yearling, he was the most prolific breeder among the 2000 models. Five of his sons have been selected as Lasater Herd Sires.

## Embryos Available

### Lasater Beefmaster 6369

A 2006 model, Lasater 6369 is highly fertile and functional. The ideal cow in a multi-trait selection program. We have embryos from her by Lasater 8208.

### Lasater Beefmaster 9720

A 1999 model, Lasater 9720 is a Pacesetter within BBU.

The qualifications of the Pacesetter program require a female to have her first calf on time, produce a calf that is the near the top of its contemporary group, and continue to do so in future production years. The Pacesetter program is designed to recognize hard-working, productive cows. We have embryos from her by Lasater 8208, Lasater 0192 & Lasater 7261.

### Lasater Beefmaster 3795

**NO PICTURE OF  
3795  
AVAILABLE**

A 2003 model, Lasater 3795 is highly fertile and functional. The ideal cow in a multi-trait selection program. Before deciding to flush Lasater 3795, she was raising her 8th consecutive calf. We have embryos from her by Lasater 0192.

**Lasater Beefmaster 0192  
Sire to these  
Embryos**

## Pictures from around the ranch in Falfurrias

## **AUCTION FORMAT**

Ranch Auction: Although our Sale has an auction format, it has no fast-talking auctioneer. Every bull will have a base price of \$2,200. When it is time to sell a bull, we will ask those who are interested, at the base price, to raise their buyer number. If there is only one number in the air, the bull will be sold to that number at the base price. If there is more than one number in the air, we will increase the price in \$200 increments until only one number remains. This provides a very simple way to purchase bulls. In the event of a tie bid, when the last two (or more) buyer numbers drop out at the same time, we give the bid to the bidder with the lowest buyer number. The other bidder(s) will then be asked to increase the bid \$100 to stay in the auction. If the bid is increased, then the bidder with the lowest buyer number can raise the bid another \$100, and so on. Basically, we will have a traditional auction between the two (or more) bidders who dropped out at the same time.

## **SHOOT OUT FORMAT**

We will possibly have multiple pens of menu priced cattle available. When there is an animal with multiple interested parties, we will have what we call a Shoot Out. We begin with all interested parties at the listed menu price and increase the price by \$100 increments until there is only one person remaining. That person will buy the animal at the final price.

## SELF HAUL CATTLE TRANSPORTATION CREDIT

A \$0.12 per mile credit will be given on each bull purchased in the sale based on the distance you live from the ranch in Falfurrias, TX. For example, if you live in Lubbock TX, 548 miles from the ranch and you purchase two bulls in the sale, you would be credited \$132.00 (66.00 for each bull) off the purchase price of the bulls when you settle up after the sale. This credit applies only to bulls that sell on sale day. It does not apply to females or calves that sell private treaty during the field day and sale. If you are willing to haul cattle in addition to your own, please let us know. Also, if you need help finding transportation for cattle back to your area, feel free to contact us.

## \*\*\*\*\*DELIVERY DISCOUNT\*\*\*\*\*

Please call Alex about a freight allowance for volume purchases.

## Performance Data and Measurements

### ACTUAL AND ADJUSTED WEIGHTS

Actual birth weights, weaning weights, and yearling weights are given for each bull. The 285-day and 365-day adjusted weights listed in the catalog do not include any adjustments for age of dam. These adjusted weights will not appear on the breeding certificates of the bulls.

### RATIOS

The 285-day weight and 365-day weight ratios show how an individual bull compares with his contemporaries. Bulls out of two-year-old dams represent one contemporary group. The bulls out of mature cows represent another contemporary group. A ratio of 100 is average while a ratio of 105 is 5% above herd average and a ratio of 95 is 5% below herd average.

### ADG

Average Daily Gain. The bulls were developed solely on native range. The test consisted of 154 days between the actual weaning weight and actual yearling weight. The total pounds gained as well as average daily gain are listed in the catalog. This type of development demonstrates a bull's ability to efficiently convert native forage into pounds of beef.

### YEARLING REA AND IMF

We have yearling measurements for Rib Eye and Inter-muscular Fat, which coincides with the Beefmaster association's requirements for developing future carcass EPDs. Keep in mind; these measurements were taken when the bulls were yearlings, running on grass pastures. These measurements should be used on a comparison basis, paying more attention to ratios.

### SCROTAL CIRCUMFERENCE

Dr. Colin Durham of Colorado Vetrenary Clinic took the actual scrotal measurements listed in the catalog in early August. All bulls have passed a breeding soundness exam and will be sold with same.

### EPDs

Expected Progeny Differences. We are publishing current EPDs in the sale catalog, when available, for all of our sale bulls. EPDs are a prediction of future progeny performance based on performance information currently available. Beefmaster Breed EPDs and Averages: Birth Weight: -5.2, Weaning Weight: 22.6, Yearling Weight: 37.8, Milk: 10.1, Maternal Calving Ease: 1.2, Maternal Wean Weight (previously Total Maternal): 21.4, and Scrotal Circumference: 0.9.

NLIH = No Longer in Herd

## How Foundation Beefmaster® Herd Sires are Selected

Each August we select approximately fifteen bulls from the yearling crop to add to our bull battery. We select the most complete bulls that best exemplify the Six Essentials. Each subsequent year we re-evaluate the bulls, and with the young bulls coming into the herd, about one-third of the bull battery rotates out. The few that make it to the age of four are automatically offered in our annual sale.

## The Retired Herd Sires in this Offering

We are offering ten 2 to 4-year-old retired herd sires in an impromptu auction on Friday at 1 P.M. There will be a floor price of \$4,500.

**Foundation Beefmasters retains the semen rights on all retired herd sires. Buyers are permitted to collect for their own use.**

## Breeding Soundness Evaluations

All animals sold at our Sale and Auction are guaranteed sound, bred and with a complete Breeding Soundness Evaluation by Dr. Glen Wilkinson DVM, of Wilkinson Veterinary Clinic. Please have your vet test your bulls and cows/heifers soon after arriving at their new home to corroborate.

This bull was sired by Lasater 7081 who also sired bulls 0523 & 9023 in this year's sale.

## A brown Zebu cow with a large hump and curved horns, standing in a fenced enclosure. It has a white tag in its ear and a metal collar around its neck.

Sired by the prolific Lasater 5639 who sired 13 bull calves during his 2018 breeding season and 10 bull calves in his 2017 season.
